

# Interesting Use Cases of **TERRAFORM!**

# 01

## INFRASTRUCTURE AS CODE

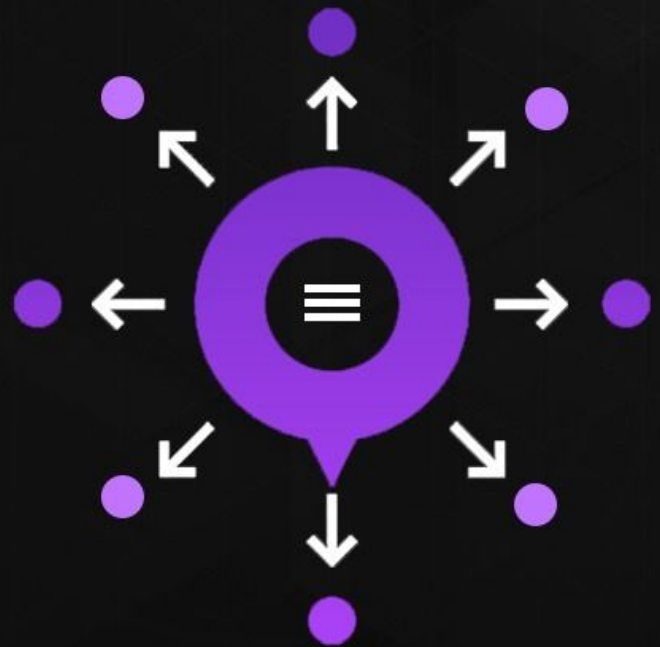

Use Infrastructure as code & automate its provisioning, including servers, firewalls, databases & almost all the aspects.

# 02

## MULTI-CODE DEPLOYMENT

- Deploy serverless functions with AWS Lambda
- Provision a load balancer in Google Cloud
- Manage Microsoft Azure

# 03

## MANAGE KUBERNETES

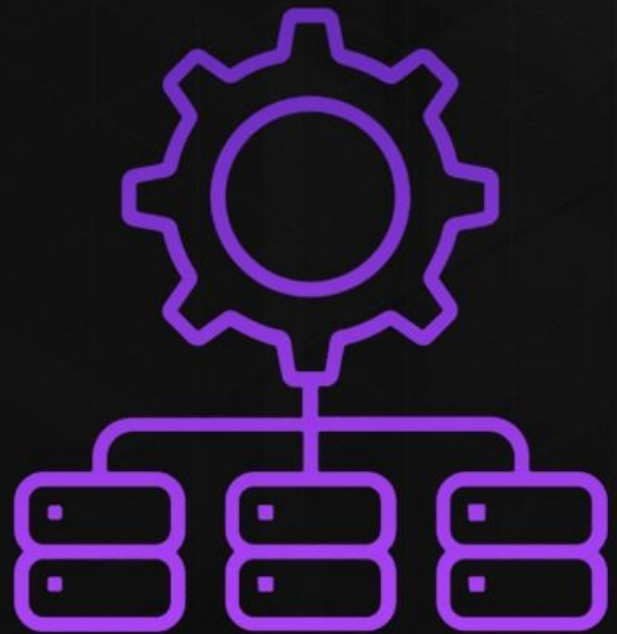

- Provision & manage Kubernetes clusters on AWS, Microsoft & Google Cloud
- Interact with clusters using Kubernetes Terraform provider

# 04

## MANAGE YOUR NETWORK

- Automate key networking tasks
- Update load member pools
- Applying firewall policies

# 05

## MANAGE VIRTUAL MACHINE IMAGES

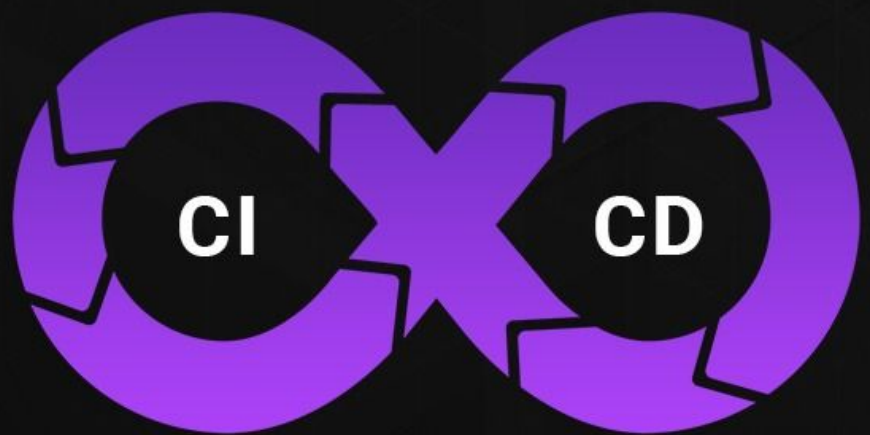

Deploy & manage virtual machines easily.

# 06

## INTEGRATE WITH EXISTING WORKFLOWS

Use existing CI/CD workflows to automate infrastructure deployments.

# 07

## ENFORCE POLICY AS CODE

Enforce policies before users create an infrastructure through Sentinel policy as code.

# 08

## INJECT SECRETS INTO TERRAFORM

Automate using dynamically generated secrets  
or credentials.

# It's time to boost your career by learning **TERRAFORM**
